

00:57

i am indeed bud um my name's john i'm a
01:00

funeral director of 15 years um i'm
01:02

based in the uk in a place called milton
01:05

keynes which is kind of
01:07

40 miles
01:08

lovely place i've been there yeah spoken
01:10

at how would house in milton keynes okay
01:12

small world small world my friend so
01:14

i've uh i've been a funeral director for
01:16

about 15 years now 10 of those were for
01:19

one of the big funeral providers in the
01:22

industry co-op funeral care and then
01:24

five years ago um i jumped ship and set
01:27

up on my own because i wasn't really
01:29

happy with how things were being done at
01:30

the co-op following the collapse of the
01:32

bank
01:33

um you know people kind of became um
01:36

cash cows instead of being treated the
01:38

way they should be in my opinion
01:42

so what are you seeing now being a
01:44

funeral director how are you seeing
01:45

things over the last couple of years my
01:46

did you see a pandemic last year
01:49

um so
01:51

let me start from the beginning so in
01:53

2019 i had a family come and see me who
01:56

had lost a loved one
01:58

and they had lost a loved one in the
02:00

neighbour and borough of northampton so
02:02

they asked me to go to northampton and
02:04

collect their loved one and they
02:05

complained at the time that the hospital
02:07

wouldn't let them see that loved one so
02:10

i went to the northampton hospital and
02:13

kind of
02:14

collected their loved one and while i
02:15

was there i asked the guys there in the
02:17

mortuary you know why wouldn't you let
02:18

this this family see the loved one and
02:20

they opened the the chapel doors or the
02:22

viewing room doors and there was a great
02:24

big inflatable um
02:27

kind of blow up uh pandemic mortuary i've
02:30

since found out it is and
02:31

they told me there was something really
02:33

horrible coming and this is why because
02:35

the viewing one was being used by this

02:37

big kit and that was my kind of

02:38

introduced

02:40

introduction to

02:41

covid and that was back in end of

02:44

november beginning of december 2019 um

02:48

so christmas time so they already had

02:50

this this temporary morgan knew

02:52

something terrible was coming in

02:54

november 2019.

02:56

yeah yeah that i saw it firsthand i was

02:59

told that um based on the story that

03:01

i've just told you kind of thing

03:04

okay

03:06

so um the news broke um just after

03:09

christmas and we're all told about a

03:11

chinese lab and and the wuhan wet market

03:14

that been there for hundreds of years

03:16

without an issue that suddenly was an

03:18

issue um uh

03:20

the hysteria was mounted and it wasn't

03:22

long into 2020

03:25

before i was contacted by the local bbc

03:29

and they asked

03:30

they knew that i was a funeral director

03:32

and they asked to come out and do um a
03:34

report um around covid and i'd hasten to
03:37

add at this time early on in the process
03:40

i believed covert exactly the same as
03:42

everyone else you know i was um
03:43

convinced it was real we were being told
03:45

it was real and you have to remember
03:47

that if i go to a hospital and for
03:49

example they tell me a a
03:52

deceased is hiv or or for example is
03:55

tuberculosis
03:57

um then obviously that's something i
03:59

would take very seriously and um covid
04:01

was no exception so i was kind of trying
04:04

to be as careful as i possibly could
04:06

um the bbc came they bought a cameraman
04:09

and a lady that spoke to me they briefed
04:11

me
04:12

very intently on what they were going to
04:14

ask me and told me the answers they
04:16

wanted and they asked me to dress up in
04:18

full
04:20

ppe and i was a bit reluctant at the
04:22

time because
04:23

you know i'd um i mean all funeral
04:25

directors will use aprons and obviously
04:28

gloves but masks and stuff like that is
04:30

not something we would usually use
04:32

um i worked for the coroner for seven
04:35

years and the only time i would ever use
04:36

a mask there is if i was attending the
04:39

scene of a death where that deceased had
04:41

perhaps been there for a while you know
04:42

an undiscovered death and then you put
04:44

vicks on the mask and the idea is just
04:46

to keep the smell away not it's not
04:48

going to protect you against anything at
04:50

least of all virus um so so
04:53

they got the interview they wanted you
04:55

know and promoted the hysteria
04:58

and i kind of kicked myself now because
05:00

um it's simply not true any of it is not
05:03

true
05:04

so um
05:05

very soon uh into 2020 um
05:09

funeral directors began panicking you
05:11

know the death rate wasn't there though
05:12

there was no increased death rate that
05:14

we were seeing deceased that were

05:16

deliberately labeled with covid but

05:18

there wasn't any increase in numbers at

05:20

all and that was across the board um as

05:23

far as i was aware certainly every

05:24

funeral director i spoke to and every

05:26

mortar i went into weren't seeing

05:28

pandemic numbers we were seeing people

05:30

that were labeled with covid but um you

05:32

know how deadly was that i really can't

05:35

tell you

05:36

so um i had a family come and see me

05:38

who'd lost a young child and the child

05:40

was six

05:42

uh and a cancer sufferer so so totally

05:45

not related um basically they wanted to

05:47

see their little girl and this was at a

05:48

time when other funeral directors were

05:51

taking um

05:52

body bags and coffins to the hospital

05:54

and sealing people straight in those

05:55

body bags and coffins there and then

05:58

there was no dressing no no viewings

06:01

nothing like that because they could do

06:03

it because of covid you know um i felt

06:06

that that wasn't fair to those people
06:08

that had lost someone via a zoom call or
06:12

standing there in a hazmat suit you know
06:14

that that just
06:15

isn't fair isn't fair so i watched
06:18

address this little girl and and gave
06:21

the family time to see their their their
06:23

child um as any decent human would
06:26

and i kind of came to the conclusion
06:28

then you know
06:30

my job is to look after people and if
06:31

that means that i fall over in the
06:34

process of doing that so be it and i've
06:36

watched address to everyone the whole
06:37

way through covert regardless of whether
06:40

they've been covered um diagnosis or not
06:44

okay funny that you haven't died of
06:46

covert brother
06:47

well not only that but my wife's helped
06:49

me and i've also got an embalmer who
06:52

works for me full-time who's 55 he's a
06:55

heart attack survivor 10 years now um
06:58

and he's he's you know none of us have
07:00

had a day off we're all perfectly
07:01

healthy and they streamline the process

07:04

now where a doctor is not in attendance

07:06

death the police are not in attendance

07:07

for a death and whoever is on the scene

07:11

um

07:12

rings the doctor the doctor say okay if

07:14

you're sure they're dead ring the

07:15

undertaker we go straight out and i was

07:17

picking these people up still warm you

07:19

know so so um it wasn't like they were

07:21

sitting in refrigeration or cold storage

07:23

for a week and any virus they might have

07:25

had it had disappeared you know if they

07:28

were covid patients and they were

07:30

infectious i'm sure i would have i would

07:32

have got it because i have not worn a

07:33

mask the whole time um neither is my

07:35

wife neither is my embalmer so

07:38

so what are you seeing with numbers now

07:41

so um

07:43

well kind of rewinding back to 2020 in

07:46

in march and april we we saw a brief

07:48

spike for about two weeks two and a half

07:51

weeks maybe three weeks where unusually

07:54

the phone started ringing and as a

07:56

society we're very good at getting

07:58

people to pass away in hospital um

08:01

and

08:02

i would say if i have 10 collections of

08:04

deceased eight of them would be hospital

08:07

removals one of them would be from a

08:09

care home and one of them would be of a

08:12

residential address where someone's gone

08:13

home to die or a hospice where people go

08:16

to die for palliative care and

08:19

we suddenly had an announcement on the

08:21

tv from government that um they were

08:23

going to try and protect the most

08:25

vulnerable in care homes and that these

08:28

care homes

08:29

would be um the places that were hit the

08:32

hardest which i kind of at the time

08:34

thought was really strange because i

08:35

don't understand how a virus can

08:38

attack a specific building

08:40

do you know it either is in community or

08:43

it isn't in the community and i kind of

08:44

you know it was thing after thing but

08:47

that i just wasn't they were saying that

08:48

wasn't making sense on the coalface as a

08:51

as an undertaker so um i got called

08:54

every night for three weeks to care

08:55

homes and this was at a time when matt

08:57

hancock um who's since been dismissed

09:00

from government um

09:01

uh kind of uh um had transferred all of

09:05

the elderly in hospitals into care homes

09:08

he'd been very careful to label them all

09:10

as covid

09:12

and he put them into care homes and i've

09:14

since found out that at the exact same

09:16

time there was a thousand percent

09:18

increase in the amount of midazolam

09:20

sedative purchased at that time and

09:22

there's an extensive paper trail that

09:25

documents that very clearly now i worked

<https://www.dailymail.co.uk/news/article-8514081/Number-prescriptions-drug-midazolam-doubled-height-pandemic.html>

]

09:28

for the big funeral provider for 10

09:30

years who have

09:32

60 market share and in that time i was

09:35

never ever ever ever called to a care

09:38

home three consecutive nights

09:42

you know so for um for me being a small

09:45

family undertaker to suddenly be called

09:47

every night for nearly three weeks

09:49

exclusively to care homes and nowhere

09:51

else um is remarkably um it's probably

09:55

about as likely as me winning the

09:57

lottery several times in three weeks it

09:59

just doesn't happen it's impossible um

10:02

i would hasten to add that all of those

10:04

people were labeled with covid um i

10:06

never saw a doctor in attendance once no

10:09

doctor ever attended to my knowledge um

10:12

i never saw a covert test once i never

10:15

saw um

10:16

an incubator or uh uh sorry a ventilator

10:20

so there was no need for those patients

10:22

to be um

10:23

uh overdosed shall we say or or heavily

10:26

sedated to be intubated because there

10:28

were no ventilators so um **i suspect that**

10:31

thousands of people were killed uh

10:34

ethanized in these care homes using

10:36

midazolam and on the odd occasion i did
10:38

in fact see
10:40

small vials 84rm uh perhaps on the bedside
10:42

cabinet or in a bin because i was
10:44

actually looking for them at that point
10:45

you know where they hadn't perhaps been
10:47

as careful as they ought to have been
10:49

doing that kind of thing

10:51

so that was something that was um
10:54

you know kind of raised alarms for me
10:56

and then
10:57

as abruptly as that started it finished
11:00

um and then i had a pandemic guy ring me
11:02

and he introduced himself as a
11:04

government-sponsored pandemic guy and he
11:06

told me that um
11:08

as a funeral director his job was to
11:10

call all of the funeral directors in the
11:12

area and he was to collate the numbers
11:15

of deceased so first of all he would ask
11:17

me uh for example what my capacity was
11:19

at the funeral home so how many i could
11:22

hold here at the funeral home um how
11:24

many i picked up that week how many were
11:26

covered
11:27

and how many you know where they come
11:29

from kind of thing so it wasn't really
11:31

very long he used to call every monday
11:33

he almost immediately started steering
11:35

me and by that the conversation would go
11:37

much like
11:38

i picked a guy up from a care home that
11:40

was in his 90s he'd had a full life
11:43

no doctor in attendance no um
11:45

covered test
11:47

um
11:48

he wasn't a covid death it was a
11:49

natural death of a guy of 95
11:52

and i picked up someone from
11:54

the local hospice who'd succumbed to
11:56

cancer was a terminal cancer patient

11:59

both of them were instantly labeled as
12:00

covid um because the guy said we were
12:03

told they were covid they must been
12:04

covered in there we've got to put them
12:06

down as covered **everyone, even one guy**
12:08

that was run over every death possible
12:11

was listed as a covid death when they
12:13

just weren't covid deaths and i had
12:15

people coming in um really really upset
12:18

families because they knew their loved
12:19

ones that had terminal cancer
12:22

and they were terrified that i wouldn't
12:23

wash and dress them because they'd been
12:25

labeled with covid and i kind of had to
12:27

assure them you know um please don't
12:29

worry i i will and i did i looked after
12:32

every one of them um and washed and
12:33

dressed them all because that's what
12:35

they deserved and i was doing this kind
12:37

of waiting to see if i'd fall over you
12:39

know every every morning i woke up and i
12:41

took a deep breath and
12:43

and then crack on um and lo and behold
12:45

i'm still here as is my wife as is my my
12:48

um my
12:49

embalmer you know so um the the year
12:52

2020 progressed and there was no apart
12:55

from that 12-week
12:56

call that took place in care homes and
12:59

i'm very careful with the words i choose
13:00

because i know that's what it was
13:02

statistically it's impossible to happen
13:04

you know viruses don't target care homes
13:07

exclusively
13:09

the care houses
13:10

there's a lot of people that they're
13:12

they're full of people that can't say no
13:14

yeah they've set that up and they've
13:15

brought in as a lamb there simply so
13:17

they could get their numbers up and
13:19

claim that there's a there's a wave you
13:21

know yeah of course they have and the
13:23

paper trail tells the story and
13:24

interestingly i did a funeral a little
13:26

while ago for a family and one of the

13:28

family members worked in the local

13:30

pharmacy in our local hospital and she

13:33

confirmed i couldn't resist asking her

13:36

did you buy loads of this and she said

13:37

yes

13:40

yeah so what are you seeing now and the

13:42

vaccines are rolling out brother what

13:44

are you saying so um so 2020 um finished

13:48

kind of november december time and they

13:50

were widely advertising that they were

13:52

going to begin vaccinations on january

13:55

the 6th locally it was rolled out in

13:57

different areas at different times in

13:59

different parts of the world but we were

14:01

all told the lifesaver was coming in

14:03

january and i couldn't believe it really

14:05

because this pandemic guy after a number

14:08

of months he actually it's amazing how

14:10

quickly you get to know someone even

14:12

with a 30 second chat once a week and it

14:13

would be hi john how you doing

14:15

everything good yeah it's still really

14:17

quiet and he actually admitted to me

14:18

said i don't honestly know why i'm doing

14:20

this job he said because there are no
14:22

covid deaths and everyone's saying the
14:23

same thing
14:25

that's from the guy that was speaking to
14:27

all of the funeral directors locally
14:30

you know you tell me that guy said
14:32

that to me personally so so and he was
14:35

being sincere and and shortly after they
14:37

began vaccinating i was notified he'd no
14:39

longer be calling so clearly there's no
14:42

need for the pandemic guy to record
14:44

covid deaths now because they've
14:46

stopped him from doing so do you know
14:49

so um november december came and went we
14:52

had we were doing funerals it wasn't
14:54

busy in fact even despite the great
14:56

effort they made in care homes to bump
14:58

the numbers up
14:59

**overall 2020 was quieter than 2019 for
15:03**

**death rate and the vast majority of
15:05**

funerals we do in the uk are cremation
15:07

funerals i would estimate around 95
15:10

percent of them are cremations and the
15:12

the odd five percent would be burials
15:15

and
15:16

**we weren't up on numbers and it was the
15:18**

**same everywhere the statistics um don't
15:20**

**lie they're their
15:22**

**government statistics that show there
15:23**

**was no real increase and and it kind of
15:26**

got to the point where
15:28

**i said to a few people i began to smell
15:32**

**a rat we weren't being told the truth
15:33**

**and i said to people i bet the death
15:35**

**rate soars in january when they begin
15:37**

vaccinating and everybody laughed at me

15:39

they said no don't be stupid you're mad
15:41

and it um they **we came back to work on**
15:43

the second and on the six they began
15:46

vaccinating and the death rate was
15:47

extraordinary i've never seen anything
15:50

like it as a funeral director in 15
15:52

years
15:52

and neither is anyone else that i've
15:54

spoken to and it began exactly when they
15:56

began putting needles in arms and that
15:59

was the the recognized second wave and
16:02

that went on for about 12 weeks and

16:03

finished

16:04

abruptly the second week of of april and

16:07

and to be honest with you i'd never want

16:09

to see a death rate like it again it was

16:11

awful it was awful um and they were very

16:15

different this time it was a mixture of

16:17

all ages you know different uh well all

16:19

locations as well it wasn't for example

16:21

all care homes it was hospitals

16:23

residential addresses mostly hospital

16:25

deaths to be honest with you um and we

16:28

were finding um you know it was just

16:30

awful that was pandemic numbers **but it**

16:33

**was only when they began vaccinating and
16:35**

never before that point

16:37

were they

16:38

**were they labeling all these people as
16:40**

**covid deaths? oh as many as they
16:42**

**possibly could yeah as many as they
16:43**

**possibly could um but i suspect they
16:46**

**were vaccine injury deaths the vast
16:48**

**majority of them or perhaps overdoses of
16:51**

**midazolam or perhaps also um a
16:54**

**contributing factor is the blatant
16:56**

**neglect of people you know a lot of
16:58**

**families that i've got are telling me
17:00**

**their loved ones have died from cancer
17:01**

**and they've only managed to present at
17:03**

**stage four because nobody will see them
17:05**

**they're not going for scans anymore they
17:06**

**can't get an appointment they're being
17:08**

**fobbed off with gaviscon when they've
17:10**

**got pancreatic cancer you know and stuff
17:13**

**like that and it's just not being looked
17:15**

**at so
17:16**

**there's a clear pattern there kind of
17:18**

**emerging um and that went until april 21
17:21**

**and then abruptly stopped
17:23**

**and then all we were seeing was
17:25**

**literally the quietest period i've ever
17:27**

known
17:28

certainly in five years and i think for
17:30

that's the first time in five years as
17:33

an established funeral director now that
17:35

we actually lost money because there
17:36

just wasn't anyone really passing away
17:38

and it wasn't unique to me you know i'm
17:40

in a number of other groups with funeral
17:42

directors and we joined these groups at
17:44

the beginning of the pandemic thinking
17:45

that we would perhaps need to support
17:47

each other during the covid pandemic
17:49

you know um if one of us fell over and
17:52

i'd hasten to add nobody has
17:54

do you know so um
17:56

uh
17:59

**about three weeks ago the death rate
18:01**

**started to pick up again and i'm now
18:04**

**seeing people of all ages in and all of
18:06**

**them are vaccine recipients almost
18:09**

**exclusively and the range of deaths is
18:11**

**is heart attack
18:13**

**sudden undiscovered heart condition
18:15**

**that's led to a heart attack blood clots
18:17**

**um
18:18**

**stroke and multiple organ failure um
18:22**

those are the four consistent groups
18:24

that i'm seeing or the the four
18:26

consistent types of death that i'm
18:28

seeing um and it's all ages uh i went to
18:31

get my hair cut a couple of weeks ago i
18:33

went into my local barbers and they're
18:35

all very somber and down i kind of said
18:37

all right guys what's up one of the
18:39

barbers in there 23 had died an hour and
18:41

a half after he'd taken his second chap
18:43

you know um heart attack at 23 23 years
18:46

old um

18:48

**i've had a guy in whose father went down
18:51**

**and got a jab and was paralyzed almost
18:52**

**instantly he was then seen as vulnerable
18:55**

**so they gave him a second job three
18:57**

**weeks in and he was found dead at home
18:58**

**the following day i've had a gentleman
19:01**

**in who i was doing a funeral for his mum
19:03**

went blind almost immediately um i've
19:06

**i've obviously since i've gone public
19:08**

**about my concerns
19:10**

**nobody wants to talk to me now you know
19:12**

**the bbc
19:13**

**the silence is definite they're quite
19:15**

**happy for me to promote the hysteria but
19:18**

now i'm actually voicing concerns and

19:20

seeing a pattern of death related

19:22

directly to the vaccines

19:24

nobody wants to talk about it now and

19:26

this is despite the fact that there are

19:28

a number of

19:29

very very eminent people

19:32

and thousands of doctors globally nurses

19:35

consultants

19:36

professors virologists all saying the

19:39

same thing **the government seem to be**

19:40

pressing ahead and and blackmailing

19:43

coercing and forcing people and slowly

19:46

creating a two-tier kind of nazi type

19:49

society for a pandemic that isn't there

19:52

**and the delta variant i can tell you is
19:54**

**widely recognized within the nhs as a
19:57**

**vaccine injury it's not
19:59**

**it's not a virus it's vaccine injury and
20:02**

**i um and i can tell you as a funeral
20:04**

**director working on the coal face
20:06**

**you've been told and
20:08**

**and
20:10**

**and weaved a very elaborate lie to
20:13**

**convince everyone that they're ill when
20:15**

**there's a dangerous virus and you need a
20:17**

life-saving jab and the real death rate
20:20

was in care homes as a result of uh
20:23

midazolam and then the deliberate
20:26

re-labeling of every normal death as a
20:28

covid death

20:29

and then we've seen the
20:32

extreme death rate once they actually
20:34

began vaccinating and it is definitely a
20:37

hundred percent that i can tell you as a
20:39

funeral director now some of the
20:40

families that come to me are totally
20:43

unaware and **i ask every family is their**
20:46

loved one um jabbed and they'll say yeah
20:49

they're double jabs but it couldn't have
20:50

been that because it was eight weeks ago
20:53

they just don't see the connection and

20:55

i'm not there to call their bluff i'm

20:57

there to look after their mum or dad i

20:59

see the connection consistently and i

21:02

also see great efforts um being made not

21:05

to acknowledge it **now two things are**

21:07

going to happen shortly and i can tell

21:08

you this with amazing foresight they're

21:11

already jabbing children they've been

21:14

inventing new variants a new newly named

21:17

variant every other month and the idea

21:19

of that is there isn't a variant is to

21:21

get you used to the idea of there being

21:24

a variant and **what will happen shortly**

21:26

with all these children that they're

21:27

injecting his children will get sick and

21:31

children will get die as a direct result

21:34

of these injections

21:36

it will swiftly be labeled as a new

21:38

variant they will parade crisis actors

21:41

and bereaved parents on the tv

21:43

mainstream media

21:45

urging you to get a job and protect the

21:47

children um

21:49

it's a certainty it will happen and i'm

21:51

waiting for it to happen it's 100 i've

21:54

got no doubt in my mind and you'll all

21:56

be amazed at the amazing foresight i had

21:59

um if you're in any doubt um take a look

22:02

at where you live and what is going on

22:04

and who's passing away

22:06

and they're all job recipients and any

22:08

funeral director with an ounce of

22:10

integrity and honesty will tell you that

22:12

and since i'm kind of going public i've

22:15

had about 45 different funeral directors

22:18

or people working in the funeral

22:20

industry that have directly reached out

22:22

to me they're very aware of what's going

22:23

on they're all very very very scared and

22:26

frightened **if they're willing to murder**

22:28

people the way that they're doing i

22:30

suspect that they won't think twice

22:32

about silencing people like myself um

22:36

and i know my days are numbered for for

22:38

daring to speak the truth but the

22:40

reality is this there is no covid

22:43

pandemic and i'm living proof of that um

22:46

it's it's all been designed to get you

22:49

to believe it and to take a a vaccine a

22:52

vaccine that they're now do you know how

22:53

many children i've had in or that have

22:56

heard

22:56

through that my network of funeral

22:58

directors in maybe a 50 or 60 mile

23:01

radius children that have died from

23:03

covid in the last well since it began

23:07

not one not a single child has passed

23:10

away from covid that i'm aware of and i

23:12

would be aware because it would be big

23:14

news you know um i don't doubt somewhere

23:17

they will magic up some child um that's
23:20

and label them with a covered death
23:22

because they've done that with many
23:23

other deaths there are no children that
23:26

have died from covid so there is no
23:28

reason whatsoever to to put these gene
23:31

therapies into children
23:33

none at all
23:34

it's absolutely indefensible and the
23:36

fact that they try and coerce a child of
23:38

12
23:39

to give consent when they can't consent
23:42

to sex they can't buy a beer they can't
23:44

get married and they can't vote
23:46

kind of tells the story doesn't it **you**
23:48

know um here we have a depopulation
23:51

agenda
23:52

and
23:52

um they're part of that depopulation is

23:55

**two fronts that they attack on one is to
23:58**

**kill people and i'm seeing that as a
23:59**

**funeral director and number two is to
24:02**

**sterilize or disable children to stop
24:05**

**them from repopulating later on in life
24:08**

**and you have to remember that a child of
24:10**

**12 who's given an injection that's going
24:12**

**to affect their fertility when will that
24:15**

**become apparent
24:16**

**if they don't die and they're not sick
24:19**

**it's going to be 10 years really before
24:20**

anyone knows

24:22

and i can tell you that is what's

24:24

happening i'm utterly convinced and i've

24:26

been um

24:27

i've had

24:29

40 45 funeral directors

24:31

for all different companies some of them

24:33

for the co-op workers have reached out

24:35

to me very scared and they've said they

24:37

totally agree with me i've spoken to

24:39

nurses of 20 and 30 years and i've also

24:42

spoken to doctors

24:44

professors and more harrowingly a number

24:47

of victims a large number an ever

24:49

growing number of victims and people

24:51

that have kind of said thank you so much

24:53

and reached out to me because they have

24:55

not got nowhere else to go

24:57

you know because nobody's listening to

24:59

them they're not interested they're so

25:01

busy oppressing them and blackmailing

25:03

them and coercing them into lining up

25:05

for a jab that's killing them
25:07

you know now um the one thing that's
25:10

going to happen is the children the
25:11

**second thing that we're going to find
25:13**

**right is in the nhs
25:15**

**they're in the same circle that i am
25:17**

**they see what's happening and i can tell
25:19**

**you they see the suffering before
25:22**

**that deceased comes to me so they know
25:24**

**full well that this delta variant they
25:27**

**mentioned a while ago is vaccine injury
25:29**

and i've had that confirmed to me
25:31

by a plethora of medical um specialists
25:34

one of them i looked after
25:36

last year he was a guy that lost his
25:37

partner um and he confided in me he said
25:40

they're extremely dangerous please john
25:42

don't touch them and this man has a
25:44

family and he said that he would never
25:46

take it ever he said because they're
25:48

extremely dangerous and he went on to
25:50

explain to me um
25:52

that the uh the testing procedures were
25:54

actually hold they were getting through
25:56

200 rhesus monkeys a week
26:00

that was testing because they were all
26:01

dying so they stopped animal testing and
26:04

this is the same stuff they're putting
26:06

in your veins in in these immunization
26:08

centers
26:10

for a kebab for a free taxi ride for a
26:12

reduction in your jail term you know
26:15

it's not right it's not normal
26:18

**why can't people see that you know
but
26:20**

**we've now got people everywhere that
are**

26:22

so convinced because they've had 18

26:24

months of total brainwashing

26:27

that they believe it and they're scared

26:28

to death and i watch children walk to

26:30

school with a mask on

26:32

in the open air people sitting in their

26:33

cars they're all terrified and they're
26:35

not being told the truth the truth is
26:39

it's these injections that are damaging
26:41

and killing people and i'm seeing that
26:43

firsthand as a funeral director and i
26:45

need to tell people because if i don't
26:48

put my head above the parapet and
26:50

sacrifice myself who else is gonna
26:54

and and i **t'll be no good me reflecting**
26:56

from one of the massive new holding
26:58

centers they've built globally
26:59

everywhere

27:00

do you know there's a massive holding
27:02

center brand new prison we've been
27:03

talking as a society we've been talking
27:06

about prison overcrowding for decades
27:08

i'm 53 now and i've i've heard it been
27:12

talked about for decades so **we're now at**
27:14

a point in time where the economies
27:16

globally are on their knees
27:19

they're on their knees and yet they've
27:21

found the money to build super prisons

27:24

super huge 30 000

27:26

um internment camps

27:28

what do you guys think they are for

27:31

they're for people who won't take the

27:34

vaccine they're going to call them

27:35

quarantine camps fema camps they're

27:37

going to put you in these camps and i

27:39

can tell you you will swiftly be

27:41

dispatched and you'll be called a

27:42

covid.

death we're seeing exactly what

27:44

we saw

27:46

um allegedly in the second world war
27:48

um now the one locally is at a place
27:50

called hmp wellingborough
27:53

it's um
27:54

they're absolutely huge that is going to
27:56

take like 30 000 the buildings are huge
27:59

except and i would urge anyone to get on
28:01

google earth and have a look at hmp
28:03

wellingborough there's supposed to be
28:05

another one in a place called glen parva
28:06

in leicester and they have a crematorium
28:09

next door and a huge mortar tree next
28:11

door
28:12

you tell me what that is for
28:15

at this
28:16

place and time where we are now why do
28:18

we need these facilities building when
28:20

the economy is on its knees
28:22

who is that benefiting and what is it
28:24

for
28:25

i would suggest it's for people that
28:26

will not accept these lethal injections
28:29

because you're **over the next**
28:32

five years

28:33

you're gonna see

28:35

pretty much everyone that you know and

28:37

love potentially die if they're a

28:39

vaccine recipient and i've heard this

28:41

this is this is um things that i've

28:43

heard from far more qualified eminent

28:46

specialists than me highly respected men

28:48

universally acclaimed um and **i'm seeing**

28:51

the start of that as an undertaker now

28:53

with people coming in in their 40s 50s

28:56

i've got a guy in his 30s

28:58

um

28:59

**you know people that shouldn't be
29:01**

**dying they shouldn't be getting heart
29:03**

**conditions they shouldn't be suffering
29:05**

**stroke
29:07**

**um and that's happening right now and
29:08**

**yet now they're targeting children
29:12**

**when will people wake up will it be when
29:14**

**children die or will they believe the
29:16**

**new variant yarn that they're going to
29:18**

**be told and i can tell you that's what
29:19**

**they will say it's a brand new variant
29:21**

**it's targeting children we've all got to
29:23**

protect the children and they may well 29:25

try and mandate on the back of that and
29:26

then the manhunt begins and they'll be
29:28

able to fill up these large quarantine
29:30

centers weren't they
29:32

they're building them everywhere too
29:33

they're building them here in australia
29:34

they're quite quiet
29:36

yeah i've been i've been um i've been in
29:38

touch with a number of people um
29:40

globally globally from australia new
29:42

zealand my heart goes out to you um
29:45

how i i'm honestly of the opinion that
29:47

the only one that's going to save
29:48

australians
29:50

is australians
29:52

whoever you've got to stand the people
29:54

have to stand up i mean there's a lot of
29:55

pushback but not enough and not enough
29:58

people are becoming
29:59

there's not enough people are aware that
30:01

it's a fraud you know and it is it's a

30:03

quantifiable fraud

30:06

what's something what would you what's

30:08

some piece of advice you'd like to give

30:10

to people try to keep this short so i'll

30:11

post actually i'll post this interview

30:13

up i'll just this conversation i'll post

30:14

it up on youtube so people can look at

30:16

it yeah please do it let's keep it short

30:18

so they watch it you know

30:20

my advice to you is to get out there

30:22

and and let your politicians know

30:24

exactly what you think their strength in

30:26

numbers you are the power collectively

30:29

because the way they're chipping away at

30:30

society pretty soon you're going to be

30:32

dragged off to one of these camps how

30:34

many people in your street is going to

30:35

come out the house and stop that

30:36

happening?

30:37

if you don't help yourself nobody else

30:40

will i can tell you and you'll be

30:41

rounded up into these camps there'll be

30:43

an outbreak in these camps of covid and

30:45

you'll see people carted out some people

30:47

will buckle and they'll accept a lethal

30:49

injection just to get back released to

30:51

be on on home lockdown

30:53

the time is now to do something because

30:55

i can tell you as a funeral director

30:57

it'll be no good us reflecting in 12

30:59

months time from inside a prison cell

31:02

and wishing that you'd have done

31:03

something wishing you to save your

31:05

children the time to do it is now uh

31:08

and speak out if you're in the industry

31:10

**you need to speak out if you're in the
31:13**

**nhs and you're about to lose your job
31:15**

**and because you refusing the vaccines
31:17**

**that you know is doing this damage for
31:19**

christ's sake speak out you owe it to

31:21

people

31:22

um very interestingly the the

31:24

hippocratic oath or the hypocritical

31:26

oath as i call it now um in hospitals uh

31:30

as was revised in 2001 to admit the

31:32

wording we we would do no harm

31:35

you know so so it does that give people

31:38

license now to to harm people **i've**

31:40

**spoken to nurses who have been called
31:42**

**into rooms and been told by senior
31:46**

**medical management teams to deliver a
31:48**

**dose of 60 milligrams of midazolam a
31:50**

**fatal dose to patients patients that are
31:53**

**not even dying patients labeled with
31:56**

**covid
31:58**

**in a a a a fundamentally flawed process
32:01**

**the pcr test should never be done on
32:04**

**more than 10 cycles the guy who invented
32:07**

**that test those were his words um and
32:10**

**incidentally he's dead now you know he
32:12**

**started a while ago um they're doing 45
32:14**

**cycles so the way it works is is if
32:16**

**you're a cancer patient you go in
32:18**

**hospital for palliative care um and
32:21**

**basically palliative care or the
32:22**

**liverpool pathway means you're starved
32:24**

**to death with a morphine driver in you
32:27**

**and don't get me wrong for some people
32:28**

that may be the most merciful end and i

32:31

can respect that but the key element

32:32

here is consent

32:34

and these people are having dnr's are

32:36

placed on them and they're being coerced

32:39

and blackmailed into

32:40

signing these these livable pathways for

32:42

people that are not even dying do you

32:44

know people that were

32:46

designated as covid

32:48

with a test that is non-descript it just

32:51

doesn't it's not a logical there's no

32:53

science behind it the guy who invented

32:55

it has said that and yet they're driving

32:57

forward and killing people

33:00

what more do you need to know guys and

33:02

now they're targeting your children what

33:04

are you going to do are you going to

33:05

allow it are you just going to roll over

33:07

you're going to get led off to a camp

33:08

you know there are enough good people
33:10

out there to really make a difference
33:11

but only if you work collectively to do
33:14

that um and i suspect um as i've said
33:17

before the only people that will save
33:18

you guys is you
33:20

you know you can't i've listened to what
33:21

your government said over there
33:24

it's a joke it's a joke it's barbaric
33:27

it's almost very um uh there are echoes
33:30

of nazi germany in there do you know and
33:33

then some you're being blackmailed
33:35

coerced forced um
33:39

every every crime under the sun
33:41

every crime threatened with your job you
33:43

can't see your mom you can't travel you
33:45

can't work you can't go out you can't go
33:46

food shopping you can't go to a kids
33:48

play park
33:50

these are fundamental human rights that
33:52

you've lost
33:54

and **d one way with a**
33:56

van pulling up outside your house and

33:58

leading you off to an internment center

34:00

and that is where it will end and it

34:02

will end the same way here and i would
34:04

suggest that australia is probably the
34:06

test bed because although it's a big
34:08

place there is nowhere to go so so i
34:10

would urge you guys to band together
34:13

and to collectively
34:15

take action take action i'm not
34:17

encouraging crime but you are victims of
34:20

crime so do you know what are you going
34:22

to do what are you going to do
34:24

all i can tell you is my experience as a
34:26

funeral director and i've washed and
34:28

dressed um well over 100 covered cases
34:30

now many of them still warm
34:33

you're being lied to you're being lied
34:35

to
34:37

well thank you bro
34:39

i'll um i'll post this
34:42

and uh good morning welcome and um i
34:44

would say do you know anyone who wants
34:45

to reach out to me to verify who i am
34:48

my name is john o'looney and i work at
34:50

it's my own funeral home is milton
34:52

keynes family funeral services in the uk
34:55

um do a search you'll find me and please
34:57

do reach out to me to verify who i am
34:59

because i'll be happy to pick up the
35:00

phone because we'll leave a legacy guys
35:03

and if my legacy is truth and honesty
35:05

and i save one of you out there your
35:07

families are just as important as mine
35:09

you know so if that is my gift to the
35:11

world before i i'm swiftly dispatched
35:14

from it i'll take it
35:17

no worries brother
35:19

thanks for this conversation john
35:21

you're more than welcome and and thank
35:22

you for for sharing it because it's a
35:25

message that i can't get out to people
35:26

without people like you to share it so i
35:29

would urge everyone to share it far and
35:31

wide and if you can send me a copy back
35:33

i i would have a lot of people waiting
35:35

for me to share at this end as well and

35:37

i want to do that

35:38

i'll just added a couple little bits out

35:40

like the yeah messed up intro and a

35:43

couple of little chat at the end here

35:44

and i'll i'll um go and i'll post it

35:47

today brother it'll be on my butcher

35:48

channel

35:49

in probably

35:51

ten hours eight to ten hours if you can

35:53

um send me a link to download it as well

35:55

that would be appreciated as well as a

35:57

link because i'll share the url but if i

35:59

can have a hard copy that's going out on

36:01

a number of usb sticks to a number of

36:03

sources along with another load of of

36:06

interviews that that hopefully will help

36:08

the generations of the future

36:10

there's a there's a website some call it

36:12

somewhere there's a website called

36:14

getvideo.org

36:16

you go just paste when i give you the

36:18

bit shoot url just paste that url in

36:20

there and you can download it with that

36:22

site yes please

36:23

throw an email over to me with that on
36:25

or a message or something
36:28

just to reiterate my email address is
36:30

john which is john at and then it's the
36:33

initials of the business mike kilo
36:36

foxtrot foxtrot sierra dot co dot uk so
36:40

john at mkf
36:42

s dot co dot uk
36:45

i've got your email there you want me to
36:46

put your email below the video click
36:48

please please please do because without
36:50

you verifying that i am actually a
36:52

funeral director and it doesn't carry as
36:54

much weight as it does me being verified
36:57

as a funeral director
36:58

yeah not a problem brother all right
37:00

i'll let this up and i'll get it up
37:02

tonight god bless you i really
37:04

appreciate your time and and god bless
37:06

you australia you know don't think that
37:08

you're on your own out there we are
37:10

furiously with how you're being treated as
37:12

as much as how we're being treated and
37:14

collectively
37:15

we wield a great amount of power as

37:17

consumers i would urge you to band

37:19

together and exercise that power because

37:21

if you don't

37:22

uh the end is coming

37:24

yeah i know i know bro

37:26

god bless man

37:28

take care bye bye

37:32

so when you listen to that folks

37:34

as he said the vaccination is the delta

37:37

strain the delta strain is vaccine

37:40

damage

37:41

and another thing that he shared with me

37:43

at the end of that conversation was that

37:45

he was approached by a russian youth

37:48

service rt

37:50

and he was offered 85 000 pounds in

37:53

order to keep quiet he's going to send

37:55

me that email and i will share that with

37:57

you on a future report

38:00

i urge you to get in contact with this

38:02

guy like if you're someone out there who

38:04

does podcasts anybody who is doing

38:07

anything and speaking out against this

38:08

covert thing i urge you to get in

38:10

**contact with john o'looney and to
38:12**

**interview him
38:14**

**have him on your show get this
38:16**

**information out to as many people as
38:18**

**possible
38:19**

**you'll find all of his contact details
38:21**

**below this video clip
38:24**

**thanks for watching folks in la cash
39:24**

you
